We have teamed up with Smart Foundations Ireland to provide our clients with solution for a concrete free foundations at an affordable cost!

Ground screws are installed without digging and damaging your garden or environment. Foundations with ground screws are stable for decades, but environmentally friendly and removable if necessary.. The easiest and most cost-effective way of getting a timber base done for your garden room or log cabin.

- Cost and time saving
- No digging, no concreting
- Proven high pressures, pulling-out force
- Instantly loadable, no waiting period
- Sustainable and environmentally-friendly

Option 1: Fully insulated timber frame base made out of treated 4x2 inch (50x100mm) timber and supported by ground screws. The base is insulated with EPS 70 100mm board and finished with 18mm T&G OSB board, creating a strong insulated slab ready for flooring.

Option 2: Timber-frame base made out of treated 4x2 inch (50x100mm) timber and supported by ground screws, super sturdy and ready to be built immediately after the installation. Eco-friendly option and can be relocated if needed with minimum disturbance to the surroundings.
